

No doctor
would ever
prescribe
tobacco...

so why do
pharmacies
sell it?

It's time to end this practice.

Tobacco *Action* Coalition

OF LONG ISLAND

- Tobacco is the only legal product that when used exactly as intended will kill half of its long-term users.
- It is a conflict of interest for pharmacies, providers of health care, to also profit from the sale of harmful products such as tobacco, known to cause cancer, heart and pulmonary diseases.

**I agree selling tobacco products in
pharmacies is a problem in my community.**
